RAMAGE TRIO

THE[®]
ITALIAN
LAB

Dimensions:

L: 1000mm, H: 947mm, P: 400mm

Capacity: 150 LT

Weight: 70 Kg Cad.

Patented Design

The RAMAGE TRIO litter bin is made of sheet steel with a 20/10-thick body and 30/10-thick lid, secured by two sturdy hinges and lock with triangular key.

The lid houses customizable frames (color and lettering), made of 15/10-thick pre-galvanized steel, also made by laser cutting to indicate the different types of waste.

The body has decorative carvings in the shape of stylized branches, also by laser cutting. Inside are three 6/10-thick pre-galvanized steel containers

PP powder-coated, equipped with slotted handles and elastic cord for securing bags. All steel components are galvanized and powder-coated.

Fixing to the ground is done with M8 dowels (not included); adjustable feet are available for indoor environments.

Optionals Cigarette bin on the lid, made of cold galvanized and PP powder-coated sheet steel, Rain cover.
