ASH S

 THE[®]
ITALIAN
LAB

Dimensions:

H 350, Diam. 102 mm

H tank 210

Diam. tank 92 mm

ASH S is made of a laser cut shaped tube bar, 102 mm Thickness 20/10, h 350 mm. On the upper part there is a 20/10 thick perforated pressed steel: the 5-mm holes are to extinguish cigarettes, and a central 20-mm hole is to throw the butts. On the back there is a small laser cut flap, equipped with a universal triangular key, to empty a zinc-coated tank (1,5 l) for cigarette butts. All the materials are then cold galvanized and polyester powder coated.
