The main structure of the seat it is made of laser cut steel sheet, 30mm thick, decorated with an irregular "Palm frond" pattern (exclusive pattern for the UAE market). All steel components are cold galvanized and powder coated.

The top is made of lamellar Okumè wood, treated with waterproof oil, fixed to the main

steel structure trough some screws. The holes created by the "Palm frond" pattern are covered with transparent PC sheets.

The top of the seat is movable, in order to enable the lighting maintenance. The seat can be fixed to the ground with suitable bolts (not supplied).

Customizable colours.
