Fountains

CLEAN

S THE[®]
ITALIAN
LAB

Dimensions: L 300, W 700, H 900mm

The CLEAN fountain is made of a 30/10 thick rectangular-section cold galvanized and polyester powder coated steel sheet (mm 200x120x h 900). The nickel-plated brass tap has a spring-return type push button, generally closed, fastened to the 1/2" sleeve and linked to the zinc-coated steel tube with a threaded end to join it to the water supply network.

The structure is fixed with four screw at the base of the tank; the tank is made of galvanized and polyester powder coated steel; it is 700 x 300 mm, 100-mm deep. It has a rainage pipe and a 40-mm overflow hole. On the back of the tank there is an opening for the connection to the power cable. The drain cover, made of cold galvanized and polyester powder coated steel, is 700 x 300 mm, Thickness 5 mm; it can be removed to clean the tank.
