Recycling bins

RECYBIN CLAPS 2

 THE[®]
ITALIAN
LAB

Dimensions: Diam. 496, H 861 mm

Capacity: 2 x 60 L

Weight: 28.6 Kg

RECYBIN, the cylindrical shaped bin for recycling, is made of 15/10 thick zinc-coated and polyester powder coated steel sheet. On the body there are laser cut incisions of different sizes stones. Inside the bin there are 12/10 thick steel partitions to contain the waste bags; the waste bag supports are made by laser cutting a 30/10 thick zincoated sheet. On the waste bag supports there are "teeth" to anchor the bags. The lid of the "RECYBIN" bin is made of 40/10 thick cold galvanized and polyester powder coated steel: it is fixed to the structure with

a solid 30/10 thick three wings hinge.

Optional: lock with triangular key. On the lid there are laser cutted frameworks made of 15/10 thick zinc-coated steel sheets; the colours and the signs can be customized depending on the kind of waste.

The base of the bin is raised of 40 mm. It is pre-perforated with rings for ground fixing with suitable bolts (not supplied); this feature makes cleaning easier and the filth at the base of the bin is less visible.
