MINIMAL seat

Dimensions: L 2000, W 580, H 450 mm

The load bearing structure of the MINIMAL seat, dim. 1000 x 46 x h 400 is made of steel tube bar 40x40 Thickness 2 mm, covered with two 30/10 mm thick steel sheet panels. On the upper part of the load bearing structure two solid "L" elements (30x50x560 mm, Thickness 50/10) are welded to attach the exotic wooden slats, treated with natural waterproof oils, dim. 40x2000xh60 mm. In the lower part of the edge of the seat

there are two supporting L-shaped brackets 30x50x560 mm, Thickness 50/10. Ground fixing is by underground cementing (h 140 mm) on a suitable 80/10 thick lock plate with 4 suitable bolts (not supplied); the anchoring can be also done ground-level in the same way. All the steel parts are then cold galvanized and polyester powder coated.
